

Air-Assist Features & Benefits

CDF stocks the necessary adapters to make the transition from an existing IBC container to the Air-Assist **very simple**.

The Air-Assist liner is **hands free**; after attaching the air supply system, the operator can walk away during dispense.

Less residual product is left inside the liner; the user will have a **yield improvement from 95% to 99.5%** versus traditional IBC packaging.

Air-Assist liners are specially designed for convenient dispense and improved evacuation of high viscosity liquids ranging from **2,000–20,000 centipoise (cP)**.

The Air-Assist liner features a **form-fit liner with an attached air bladder**. As the air bladder is inflated, it pushes against the form-fit liner, forcing the viscous product out of the bottom dispense fitment.

For more information or to request a sample, please call **800.443.1920** or visit **www.cdf1.com**

Discover Air-Assist®

Hands-Free Operation

The **Air-Assist** liner inflates automatically, after air supply is attached — leaving operator free to manage other tasks.

**The CDF Air-Assist
is Ideal for**

Fruit Puree

Yogurt

Jelly

Dressings

Sauces

Honey

Condiments

Lotions

Creams
