

IBC LINER TECHNOLOGY

Form-Fit

Dimensionally Engineered for Maximum Product Evacuation

**The Hidden Cost of a
Poor-Fitting Liner.**

Recover More Product.

Most bulk liquid operations don't notice the loss — it happens slowly, batch after batch. The Form-Fit[™] liner is dimensionally engineered to mirror your IBC's exact interior, eliminating residual, leaks, and operator dependency. A Liner for Any Bin. Built for the Long Haul.

REAL RESULTS. REAL CUSTOMERS.

CUSTOMER SUCCESS STORY

A leading personal care manufacturer running pillow-style liners was losing an estimated **+15% of finished goods yield per IBC** to trapped product in unstructured corners — product that never reached their customer. After switching to the Form-Fit[™] liner, they recovered **up to \$800 per liner** in high-value cosmetic cream, eliminated batch-to-batch inconsistency, and freed operators from the fill line entirely.

+15%

Finished goods recovered per IBC

\$800

Recovered per Liner High End Facial Cream

Zero Leaks

THE CHALLENGE

Pillow-Style Liners Leave Product — and Profit — Behind

Pillow-style liners leak, shift during transport, and require operators to stand watch at the fill line. The costs compound: lost product, contaminated batches, cleanup labor, and failed shipments. The Form-Fit[™] liner keeps the liner in full contact with container walls from fill to empty — less residual, more extraction, more consistency across every batch.

OPERATIONAL ADVANTAGE

Hands-Free Filling. Walk Away From the Line.

- ✓ Compatible with top-fill and bottom-fill systems — gravity, pump, or vacuum
- ✓ Operators can step away; multiple lines filled simultaneously in field applications
- ✓ Snouted Form-Fit design available for aseptic filling and bag-in-box fillers
- ✓ Full-base footprint eliminates liner shift and stress concentration during transit
- ✓ Fits seamlessly into your current IBC setup — no new equipment required

WHY FORM-FIT[™] LINERS

- **Exact-Fit Engineering**
Mirrors your IBC interior — full wall contact from fill to empty.
- **CDF Smart Seal**
Every seal monitored for temp, time & pressure.
- **Universal Compatibility**
Fits virtually any collapsible IBC on the market.
- **Application Review**
Every engagement starts with a CDF process consultation.

QUALITY & COMPLIANCE

- SQF Certified Facilities
- ISO 9001:2015 Certified
- GMP Manufacturing
- FDA-Approved Film Options
- CDF Smart Seal Technology
- Comprehensive range of fitments and placements for every application and process
