

EZ-Strainer™

Inserts

EZ-Strainer inserts lie on the top of any pail or open-head steel drum, allowing valuable material to be poured through easily, while removing unwanted particles. EZ-Strainer inserts are ideal for removing debris from paints, coatings, silicone, ink and any other liquid product that needs to be particle free.

Benefits

- Patented lip ensures the strainer always stays in place
- Can be used with or without a liner inside the drum or pail
- Great tools for cleaning parts over a drum by placing the parts in the insert and capturing the cleaning solution in the drum below

Inserts

Multiple Sizes

EZ-Strainers are available for 5 gallon pails and 55 gallon drums.

Material & Mesh Choices

All liners are made in America from FDA-approved films.

The EZ-Strainer insert is molded from high molecular weight high-density polyethylene with a center screen that is available in 100 ultra-fine nylon or 200, 400 and 600 multi-element mesh (fine, medium or coarse).

EZ-Strainer bodies are also available in anti-stat; the mesh is *not* available in anti-stat.

Anti-stat contains an internal anti-stat agent to aid in the reduction of static build-up, thus reducing dry chemical static cling and chance of ignition of flammable materials.
